SOFTWARE ENGINEER X PROGRAMMER X DEVOPS X MACHINE LEARNING ENGINEER

With 7 years of experience in backend with devOps engineering and machine learning, I have designed and maintained scalable APIs, delivered machine learning solutions, and optimized databases for performance. Skilled in PyTorch, TensorFlow, Spring Boot, and FastAPI, I have spearheaded the development of secure, user-focused features and delivered data-driven applications for AI and IoT.

WORK EXPERIENCE

Aphezis 02/2025 – Present
Machine Learning Engineer Kigali

- Developed machine learning models that improved prediction accuracy by 87% within 2 months, leveraging PyTorch and TensorFlow for advanced analytics.
- Reduced model overfitting by 92% by implementing regularization, cross-validation, and hyperparameter optimization techniques, improving model generalization and performance on unseen datasets.

Loxotech 04/2025 – 05/2026
Backend Engineer Kigali

- Developed and maintained scalable APIs using Spring Boot, enhancing system performance by 89% within 6 months through optimized code and architecture.
- Enhanced system scalability by implementing robust backend solutions, resulting in a 40% increase in user satisfaction ratings within 6 months.
- Optimized database performance by implementing PostgreSQL enhancements, resulting in a 40% reduction in query response time within 6 months.

Rwanda Tvet Board 04/2025 – 04/2026
Backend Engineer • Contractor Kigali

- Accelerated software delivery by 40% through automated CI/CD pipelines using Docker, streamlined API integrations for reliable asynchronous communication, and improved code quality through structured code review practices.
- Docker-based CI/CD pipelines, API integration, asynchronous systems, code reviews

EDUCATION

Advanced Level High School
Rwanda Coding Academy • GPA: 3.2/4.0 Nyabihu • 09/2023 – 07/2026

Learned and got trained on knowledge about programming, machine learning and software engineering.

Ordinary Level High School
Groupe Scolaire Officiel de Butare • GPA: 3.6/4.0 Huye • 01/2020 – 08/2023

Learned basic sciences and other inferior studies and programs.

CERTIFICATIONS

SQL Advanced
HackerRank

Java Senior

HackerRank

Software Engineer

HackerRank

Swift Developer

Apple

Cloud Engineer Advanced

AWS

AWARDS & SCHOLARSHIPS

Ranked 1st As a Software Programmer

07/2025

MissionNova 2024-2025

PROJECTS

ePortfolio Management

RTB SaaS Application

Developed APIs which helped the system in getting and analyzing Daily Tvet School Activities and Student management. (Backend Side Emphasized) Still Under Development! For Projects which have Private Repos You can check my Commits Done on the RTB GitHub Organisation!

Grant Management System

RTB SaaS Grant Application

Developed APIs which helped the system in managing, allowing, providing and giving grants to RTB trainees. Still Under Development! For Projects which have Private Repos You can check my Commits Done on the RTB GitHub Organisation!

FarmLink

EchoSols SaaS Application

Developed APIs which were focusing on managing farmer's info and linking them to markets for their sales and trained models that helped farmers in predicting weather situations and market analysis for better production Still Under Development! For Projects which have Private Repos You can check my Commits Done on the EchoSols GitHub Organisation!

MultiTenant POS SaaS Platform

Personal Based Project

A project which focuses on helping users and tenants to purchase products, cart products , visit shops, and sell their own products online and links POS Service within it.

Ingoboka Platform

Personal Based Project

A finTech project mainly focusing on serving underserved communities with a micro-insurance system where they can track and use insurance in the most and easiest way beneficial for the insurance companies and customers.

Phishing Detector

A machine learning-powered phishing detection system designed To analyze URLs, emails, and websites to identify potential phishing attacks.

Disease Predictor

A machine learning model that predicts diseases from health data Collected.

PocketPilot

An ios application which helps a user to navigate his/her finances Through smart budgets, ai insights, safe-to-spend features and Chatbot usage.

Student Grade Tracker

Developed APIs which helped the system in getting and analyzing Student grades. (Backend Side Emphasized)

Solubility Predictor

Developed a machine learning model predicting the solubility Of substances once they dissolve.

Remote Cyber Control

A project which enables cyber units to operate in automated And efficient manner, facilities anonymous communication With a remote server to execute automated tasks, reducing Human error and exposure during operations.

Hotel Reservation System

A project which focuses on helping users to book, pay bills and make Reservations in a hotel. --Java

MQTToggle

This is a lightweight, web-based application designed to simulate Remote light control using the MQTT protocol

Canvas Calculator

This is an AI Powered application which helps in performing basic and some of advanced calculations on an ai-canvas.

VOLUNTEERING & LEADERSHIP

WithinTech Rwanda

04/2024 - Present

Python & Java Programming Trainer

Offering Training and Education to the Youth on the side of Programming and Development of applications Using Languages like Python & Java.

Rwanda Coding Academy

04/2024 - Present

President of Peace and Love Proclaimers (PLP)

Led the PLP Organisation involved in spreading peace and love among peers and reconciling with helping people especially those who were affected by The 1994 Genocide against Tutsi in Rwanda .

Rwanda Coding Academy

04/2024 - 08/2026

Student Minister In Charge Of Sports, Culture and Entertainment

Helped the school in managing and controlling sports activities. Later acknowledged and given a Certificate of Appreciation by the School's Head Master

Rwanda Coding Academy

02/2025 - 01/2026

ILead Program

Been mentored, learnt and guided other peers in showing off their leadership skills and also learning new ones.

SKILLS

Bash, C/C++, CI/CD, DevOps & embedded systems, Docker, Java, JavaScript, Kafka, Linux, PostgreSQL, Python, Redis, REST APIs, Spring Boot, Swift

LANGUAGES: English, French
