

Uwonkunda Mahinga Rodin

SOFTWARE ENGINEER X PROGRAMMER X DEVOPS X MACHINE
LEARNING ENGINEER

KN 197 ST
Kigali City, Nyarugenge
(+250) 794-415-318
mahingarodin@gmail.com

EXPERIENCE

Rwanda Tvet Board, Kigali— *Backend Engineer*

APRIL 2025 - PRESENT

Built CI/CD pipelines with Docker for smooth releases, integrated APIs for reliable async systems, and led code reviews.

Aphezis, Kigali — *Machine Learning Engineer*

FEB 2025 - PRESENT

Delivered machine learning solutions for prediction and data-driven applications using Pytorch , TensorFlow, and other AI algorithms.

Loxotech, Kigali — *Backend Engineer*

APRIL 2025 - PRESENT

Designed and maintained scalable backend APIs, collaborated across teams to deliver secure user-focused features, and optimized PostgreSQL/Redis for performance and data integrity.

Freelance / Project-Based Development — *Backend Engineer*

2025

Delivered backend solutions for AI, IoT, and data-driven applications using Spring Boot and FastAPI.

EDUCATION

Rwanda Coding Academy, Nyabihu— *Advanced Level High School*

SEPTEMBER 2023 - PRESENT

Learned and got trained on knowledge about programming, machine learning and software engineering.

SKILLS

Python, Java, Swift,
Spring Boot, JavaScript,
C/C++, Bash; Docker,
CI/CD, Linux, PostgreSQL,
Redis, Kafka, REST APIs,
DevOps & embedded
systems.

LANGUAGES

English, French

LANGUAGES

English, French

Groupe Scolaire Officiel de Butare, Huye— *Ordinary Level High School*

JANUARY 2020 - AUGUST 2023

Learned basic sciences and other inferior studies and programs.

PROJECTS

ePortfolio Management — RTB SaaS Application

Developed APIs which helped the system in getting and analyzing Daily Tvet School Activities and Student management.

(Backend Side Emphasized)

Link(GitHub): private Repo

Still Under Development!

For Projects which have Private Repos You can check my Commits Done on the RTB GitHub Organisation!

Grant Management System — RTB SaaS Grant Application

Developed APIs which helped the system in managing, allowing, providing and giving grants to RTB trainees.

Link(GitHub): private Repo

Still Under Development!

For Projects which have Private Repos You can check my Commits Done on the RTB GitHub Organisation!

FarmLink — EchoSols SaaS Application

Developed APIs which were focusing on managing farmer's info and linking them to markets for their sales and trained models that helped farmers in predicting weather situations and market analysis for better production

Link(GitHub):

<https://github.com/mahingaRodin/Remote-Control->

MultiTenant POS SaaS Platform — *Personal Based Project*

A project which focuses on helping users and tenants to purchase products, cart products, visit shops, and sell their own products online and links POS Service within it.

Link(GitHub):

(backend):

<https://github.com/mahingaRodin/Multitenant-SaaS-Pos>

(frontend):

<https://github.com/mahingaRodin/tenant-pos-sys-fe>

Phishing Detector — *Python / CyberSec / Machine Learning Application*

A machine learning-powered phishing detection system designed To analyze URLs, emails, and websites to identify potential phishing attacks.

Link(GitHub):

<https://github.com/mahingaRodin/Phishing-Detector>

Disease Predictor — *Machine Learning Application*

A machine learning model that predicts diseases from health data Collected.

Link(GitHub):

<https://github.com/mahingaRodin/Disease-Predictor>

PocketPilot — *Swift iOS Application*

An ios application which helps a user to navigate his/her finances Through smart budgets, ai insights, safe-to-spend features and Chatbot usage.

Link(GitHub):

Frontend:

<https://github.com/mahingaRodin/PocketPilot-Fe>

Backend:

<https://github.com/mahingaRodin/pocketpilot-api-v2>

VI: <https://github.com/mahingaRodin/PocketPilot-Be>

Student Grade Tracker — *Spring Boot Application*

Developed APIs which helped the system in getting and analyzing Student grades. (Backend Side Emphasized)

Link(GitHub):

<https://github.com/mahingaRodin/Student-Grade-Tracker>

Solubility Predictor — *Python & Machine Learning*

Developed a machine learning model predicting the solubility
Of substances once they dissolve.

Link(GitHub):

<https://github.com/mahingaRodin/Solubility-Predictor>

Remote Cyber Control — *Shell Application*

A project which enables cyber units to operate in automated
And efficient manner, facilities anonymous communication
With a remote server to execute automated tasks, reducing
Human error and exposure during operations.

Link(GitHub):

<https://github.com/mahingaRodin/Remote-Control->

Hotel Reservation System — *Spring Boot Application*

A project which focuses on helping users to book, pay bills and make
Reservations in a hotel.

Link(GitHub):

<https://github.com/mahingaRodin/Hotel-Reservation-System>
[--Java](#)

MQTToggle — *Embedded Systems Application*

This is a lightweight, web-based application designed to simulate
Remote light control using the MQTT protocol

Link(GitHub):

<https://github.com/mahingaRodin/MQTToggle>

Canvas Calculator — *Python / AI Application*

This is an AI Powered application which helps in performing basic and
some of advanced calculations on an ai-canvas.

Link(GitHub):

<https://github.com/mahingaRodin/Canvas-Calc>
